## PARAMETERS

Material	Plastic PP
Dimensions	L178 * D99 * H212 mm
Net Weight	1 kg
Input Voltage	110- 240 AC
Output Voltage	12V DC
Power	5w
Capacity	180ml
Noise Level	<38 DBA
Coverage	300-1000 cubic Meters
Oil Consumption	Maximum 2 ml/h
Installation Way	Desktop, Wall mounted

Remark: the oil consumption is only for reference, cause we test with the highest scent intensity setting, use our own oils, room is 30 degree, 45% air humidity.

## OPERATION INSTRUCTIONS

1 Insert the key into the key hole to open the door

2 Take out the part A, screw out the bottle, fill the oils into the bottle, screw back the bottle tightly.

3 Connect the adapter to the power jack that is on the top

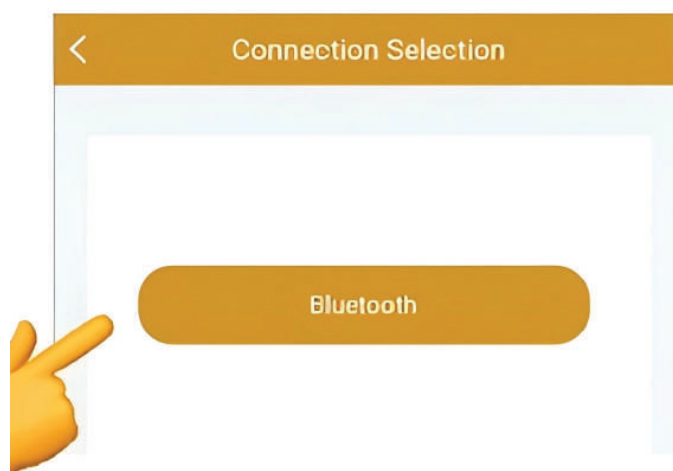

4 If need to make it wall mounted, when the wall surface is with tiles, stick the wall-mounting plate on it and squeeze out air bubbles. Hang the device after 24 hours.

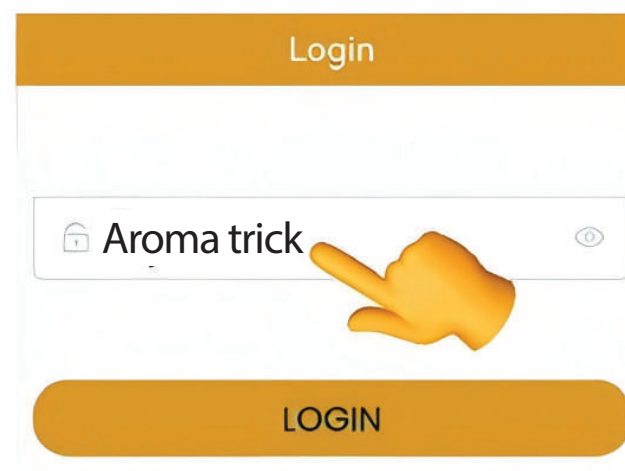

When the wall isn't smooth, stick the provided positioning paper on wall, drill two 4.5mm dia. holes (A), remove the paper. Then, insert green rubber pellets (B) into the holes and drive screws (C) into the pellets. Hang the device (D) into the screws.
